

Mission:

Evidence-based infection prevention across the continuum of practice.

Vision:

Develop competent infection preventionists through educational and networking opportunities.

Contribute to the evidence base of practice through facilitating collaborative efforts.

Advocate for infection prevention issues at the state and national level.

Strategic Plan 2025

Professional Development

Goal:

Encourage and support current and future infection prevention and control (IPC) professionals to pursue and maintain recognized certifications including the CIC, LTC-CIC, and A-IPC as a benchmark of excellence and commitment to the infection prevention and control field.

Objectives:

- Increase awareness and promote the value of the CIC, LTC-CIC, and A-IPC credentials through social media, membership recruitment strategies, and new member orientation.
- Enhance mentorship and professional development opportunities by fostering connections between new members of the infection prevention and control profession and experienced members, providing meaningful guidance, support, and ongoing professional development.
- Promote the value of engagement in committees through recruitment via social media and monthly newsletter.

Education

Goal:

Expand educational programming and resources to advance infection prevention science and support the development of Infection Prevention professionals.

Objectives:

- Offer monthly continuing education webinar series aligned with the core competencies and with the requirements for CIC, LTC-CIC, and A-IPC certification and recertification.
- Expand the topics presented at the annual conference to include data-driven, evidence-based approaches to infection prevention across the continuum of care, emphasizing innovation and real-world application in diverse health care settings.

Advocacy

Goal:

Become the recognized leading voice in Florida on issues of Infection Control and Prevention

Objectives:

- Provide information to members about important regulatory and legislative activity impacting the profession of Infection Prevention.
- Continue to promote an annual Advocacy Day to remind state legislators that our members have expertise to contribute to proposed legislation and regulatory public policy.
